PROJECTS

Personal Project, CareerFoundry

myFlix   September 2023 - November 2023

- Created a relational database using MongoDB to store user, movie, director, actor, and genre information.
- Built a RESTful API with Node.js and Express, using Mongoose to interact with the database.
- Tested API using Postman and deployed the API with Heroku.
- Created two responsive front-end applications. One using React and React Bootstrap and another using Angular and Angular Material. Users can create an account, update thier information, browse moives, and update their favorite movies list.

Personal Project, CareerFoundry

Chat   October 2023 - November 2023

- Created database using Google Firestore to store messages, images, videos, audio, and location data.
- Built a front-end client for Android phones using React Native and Expo.
- Developed and customized chatting UI using GiftedChat library.
- Tested the applications functionality using Android Studio.

WORK EXPERIENCE

Sky Language School

English Instructor   August 2023 - Present

- Instructed adult ESL students on various aspects of the English language like vocabulary, grammar, speaking, writing, reading, and listening comprehension.
- Developed lesson plans tailored to the learning goals of the students.
- Ensured students enjoyed classes which led to all of the students reporting great satisfaction with the classes and applying their skills to pass standardized tests.

POLY

English Instructor   February 2020 - April 2023

- Instructed kindergarten and elementary ESL students to improve speaking, writing, reading, and listening skills.
- Presented course material in a clear, understandable, and enjoyable way to ensure students retain the information and skills learned from the class.
- Ensured excellent student comprehension which led to the students consistently scoring higher than the school average on monthly comprehension tests with a class average of above 90%.
